

S910 Firmware Updates

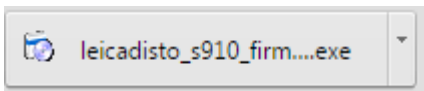

Precondition: You need Leica DISTO™ S910, USB cable and a Windows PC.

Leica DISTO S910™ Firmware Updates

How to flash the firmware on a Leica DISTO™ S910 (PDF) 

Release Date	Description	Download
Aug 2015	This firmware update fixes quite a few bugs including those that had to do with the DXF and pictures downloads as well as WiFi updates. We strongly recommend this update as it improves the functionality of WiFi on the S910 Touch. For those struggling to download files from the DISTO, this update will not erase those files and for those with data already stored on the DISTO that has not yet been downloaded, the data will not get lost.	V3371
June 2015	This firmware update improves the functionality of WiFi on the S910 Touch.	V3254

1. Download program from webpage:
<http://lasers.leica-geosystems.com/leica-disto-S910-Firmware-updates>

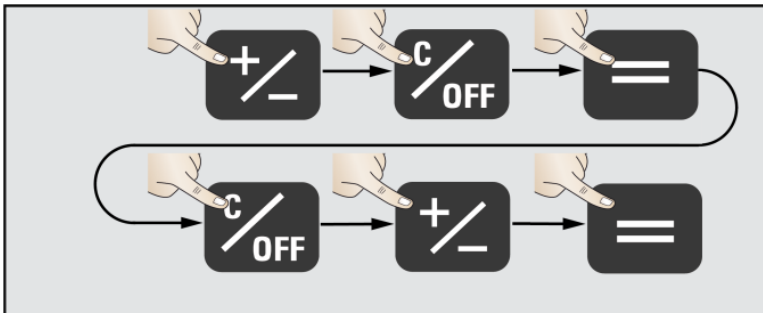

2. Execute the update program in order to install and follow instructions.

3. Start update program on PC.
